Column percentages are presented for categorical variables, and percentages are based on the number of non-missing observations for each variable.

*Categories are not mutually exclusive.

**Non-missing responses to individual variables were required in order to calculate scales. For details, please refer to Index of Scores UNM.

***The number of students indicating perpetration is used as the denominator for the relationship, location, and potential impact sections below each type of perpetration.

****Scores of 0 are removed from the calculated scales. For details, please refer to Index of Scores UNM.

*Categories are not mutually exclusive.

**Non-missing responses to individual variables were required in order to calculate scales. For details, please refer to Index of Scores UNM.

***The number of students indicating victimization is used as the denominator for the relationship, location, and potential impact sections below each type of victimization.

****Percentages are based on the number of students with a non-missing response and who indicated talking with a staff or faculty associated with UNM.

*****Scores of 0 are removed from the calculated scales. For details, please refer to Index of Scores UNM.
